

FOOD/BEVERAGE CONTROL SOLUTIONS

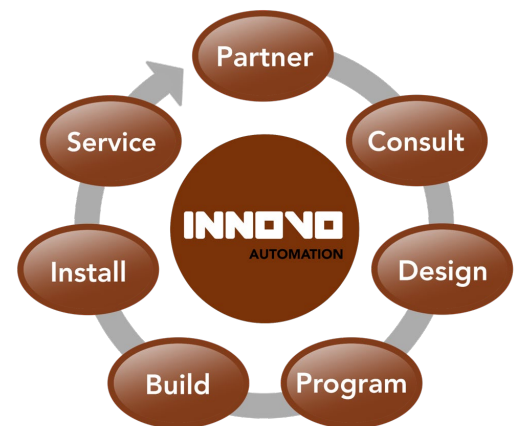

Innovo Automation is staffed with an experienced and specialized systems integration team. Our talent includes programmers, estimators, engineers, service technicians and CAD personnel. We are also a UL 508A / UL 698A panel shop equipped to manage a wide variety of control panel solutions.

Simplicity through automation means the difference between profit and loss. Innovo Automation works directly with customers to design control systems properly that enhance efficiency in ever-changing, high-demand manufacturing environments.

From a single machine to entire production lines, Innovo Automation has the expertise to quickly assess and recommend solutions to make your operation more productive. We will update or upgrade existing equipment or design fully-integrated systems based on your unique specifications.

Established in 1986, Innovo Automation has a proven success record with companies across multiple industries, helping them achieve their business goals. We partner for long-term success and want to be yours today as well as yours into the future.

MARKET BENEFITS:

- Increased Productivity •
- Improved Throughput •
- Less Waste •

For more information visit innovoautomation.com or call 651-773-5422

FOOD/BEVERAGE FOCUS:

- **FDA/DOH Standardization**

CIP Control, Recipe Management, Legal PLC Programming, IP69/IP69K Components

- **Machine Automation**

Conveyor Automation, Multiple Line Integration, Plant Floor Data Collection and Storage

- **Engineering and Programming**

Custom Software and Database Design, Complete System Programming for PLC, VFD, HMI

- **Sensors**

Ultrasonic Liquid/Bulk Level, Discrete Product Detection, Machine Vision

- **Machine Safety**

Light Curtains, Safety Zone Sensors, Safety Mats, Coordinated Emergency Stop Installation, Physical Machine Guarding
